

ENTECH

Medical, Safety and Administrative
Support Services

About Entech

History

Entech started operations in 1989 as a spinoff of its sister company Secorp Industry to provide Medical, Safety and Clerical support to the Oil and Gas, Construction and General Industry. The spinoff of the Entech name was done to brand the Entech name to our specific services. Secorp was one of the original medical providers to the oil and gas industry with jobs dating back to the mid 1970's. In Entech's seventeen years of service we have had the opportunity to work for many customers all over the world. Entech's services have been performed in state of the art facilities to extreme remote conditions such as in the jungles of Mozambique Africa. Whatever the environment Entech has been very successful at satisfying our customers individual needs which continually change based on the many different projects our customers perform.

Mission Statement

The ultimate goal of Entech is to provide the best-designed and managed worksite safety, medical and/or administrative assistant program available. Our programs are tailored to the needs of each worksite management team and initiated in the field utilizing a continuous improvement philosophy. Use of our services at the worksite will provide a safer working environment for our business partners. We are committed to creating and

Medical Support Services

Working in the oil and gas exploration and production field often puts our employees in areas far removed from western level health and emergency care. We, at Entech, are able to bring western level health care to your operation through our remote paramedic support program. We can provide highly, specially trained remote paramedics and equipment directly to your work site, anywhere in the world. Entech is familiar and experienced with providing remote medical care to most oil producing countries for many major operators and drilling contractors.

Medical Support Services

Medical Direction

All of our paramedics are under the medical supervision of our Medical Director, Kevin Rittger, M.D. Dr. Rittger who is very familiar with occupational medicine and is an emergency department physician based in Houston, Texas. He is very familiar with the industrial and remote environment and the medical care needed to protect the personnel working therein. Dr. Rittger is available 24-hours a day for medical consultation with the medics on location. He reviews all patient contacts for proper patient care and procedures. Dr. Rittger also has direct oversight of the Training and Continuing Education

Remote Medical Package

Entech utilizes an equipment package specifically designed for the harsh, remote environment. We use a standard medical package that is then modified to suit a particular region or location.

Responsibilities

- Emergency care of sick and injured personnel on location
- Routine medical care of non-emergency patients on location
- Maintain accurate patient records for all patients entering the clinic
- Maintain medical supply inventory to assure proper levels for patient care
- Maintain a current copy of Entech Medical Protocols on location
- Perform health and hygiene inspections as required by customer
- Assist in accident investigation and reporting as required by customer
- Advise site supervisor of any trends in medical cases or health problems onsite

Safety Support Services

It has been proven that a proper in-depth safety program can reduce accidents and risks in heavy industry. Entech can provide your work site with specially trained safety technicians or medic/safety technicians to assist you in implementing your safety program. Our medics are well versed in safety application, behavioral safety, job safety analysis, etc. and can help make your work site the safest working environment possible.

Sample of Job Duties

- Facilitation of Safety Meetings
- HLO (Helicopter Landing Officer)
- Assist in Maintenance of HSE Information for Facility
- Assist with Incident Causal Analysis
- Implementation of Customers Safety Programs on Location
- Performs Safety Inspections on Customer Site
- Assist in Communications
- Assist in Administrative Duties as needed by Customer
- Audits for Compliance with applicable Regulations
- Perform Safety Training where applicable

Administrative Assistant Service

Entech's Administrative Assistant Service can offer a solution to the demands placed upon the operator of an oil and gas location. An Administrative Assistant can assist in the timely and efficient completion of the various reports, manifests, tracking forms, and other clerical necessities which demand a supervisor's time that could be better spent monitoring operations.

Skills/Job Functions

- Assist with Completion of Daily Reports
- Daily Cost Tracking
- Invoice Facilitation
- Manifesting
- Dispatching
- Site Specific Orientations
- Maintain MSDS
- Rental Tool Tracking

Training and Experience

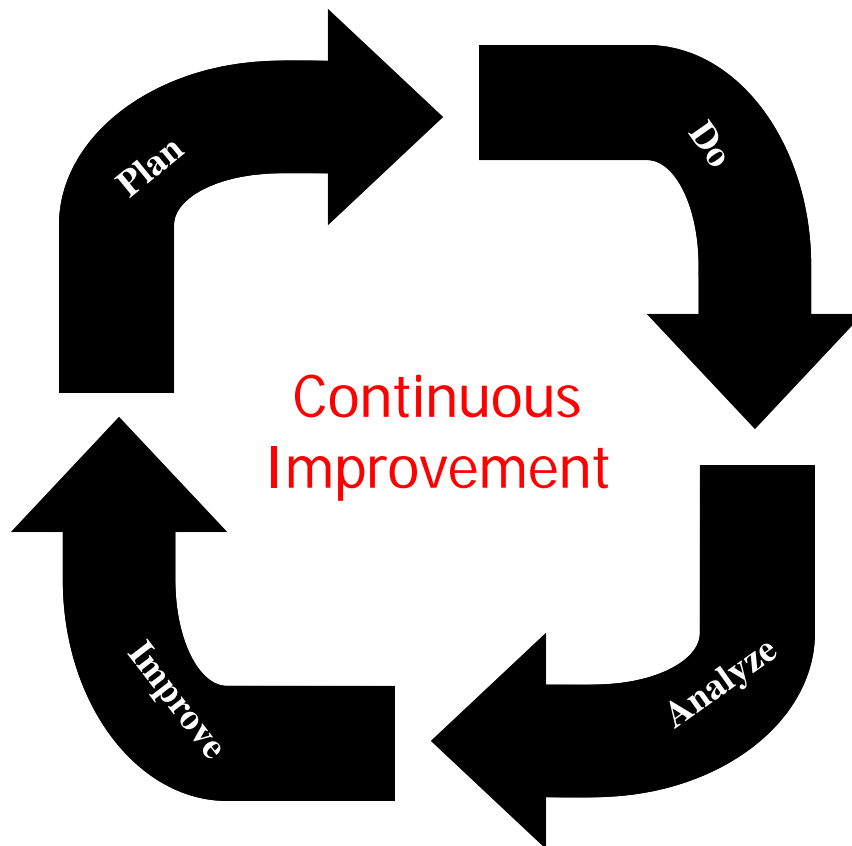

- Computer Literate
- Familiar with Oil and Gas Operations
- Basic OSHA Training
- Safe Gulf Trained

Combination of Service's

During the many years of Entech's Operations we have successfully implemented a combination of our services to meet our customers expectations. Entech has accomplished this by having clearly defined position profiles containing each positions roles and responsibilities communicated to each of our technicians prior to beginning any work. We then take these core Position Profiles and review them with each individual customer to make any needed adjustments and combinations to the roles and responsibilities to meet the needs of the individual customer and project. This process of engaging our customer to ensure Entech understands the expectations prior to the start of a project has helped Entech provide quality service to our customers and ultimately the customer satisfaction Entech strives to achieve.
